Professional Summary

Detail-driven Junior Software Developer with a Diploma in Information Technology from Tshwane University of Technology. Hands-on experience building full-stack applications using C#, .NET Core, MySQL, and modern frontend technologies. Exposure to startup incubation environments and corporate project delivery through structured mentorship and real-world development experience. Passionate about secure coding practices, clean architecture, and continuous learning within fast-paced environments such as cybersecurity.

Technical Skills

Programming & Frameworks

- C#
- .NET 6 / .NET Core
- ASP.NET Core Web API
- Blazor (MudBlazor)
- JavaScript
- TypeScript
- React

Databases

- MySQL
- SQL (joins, normalization, indexing)
- JSON-based data handling

Tools & Platforms

Git & GitHub, Azure DevOps, REST API Development, JWT Authentication, Tailwind CSS, Postman, Visual Studio, VS Code

Professional Experience

Wits Enterprise Development Incubator – Incubation Program Participant

- Participated in structured technology incubation program focused on software innovation and entrepreneurship.
- Collaborated in agile team environments to design and prototype digital solutions.
- Gained exposure to startup methodology, solution architecture, and product validation.
- Strengthened problem-solving, presentation, and technical documentation skills.
- Worked on scalable application concepts with focus on real-world impact.

SpecCon – Junior Software Developer (Project-Based Experience)

- Contributed to internal and client-based software development projects.
- Assisted in building and maintaining web applications using .NET technologies.
- Worked with MySQL databases for structured data management.
- Used Git for version control and collaboration.
- Participated in debugging, testing, and performance optimization.
- Collaborated with cross-functional teams in structured development environments.

Key Projects

Incident Management System

- Implemented role-based access (Manager, Supervisor, Technician).
- Integrated JWT authentication.
- Designed priority-based ticket workflow.
- Structured MySQL database with relational integrity.
- Implemented email notifications.

Waste Sorting Application

- Designed RESTful endpoints.
- Implemented category lookup and disposal guidelines.
- Structured MySQL schema.
- Focused on performance and clean API architecture.

Movie & TV Search Application

- Built dynamic search interface.
- Consumed third-party APIs.
- Developed responsive UI using Tailwind CSS.
- Implemented state management using React Hooks.

Education

Diploma in Information Technology – Tshwane University of Technology
